

**METALS TECHNOLOGIST
MACHINING TECHNICIAN (M/W/D)**

YOUR FUTURE YOUR PATH

ANDRITZ

ENGINEERED SUCCESS

Apprenticeship in metals technology – machining technician

If you accept the challenge of bringing metals into shape!

Duration of apprenticeship: 3½ years

Your work:

As a machining technician, you work on CNC lathes and milling machines. You program the controls of these machines and check subsequent machining of mechanical components.

Your qualifications:

- Compulsory schooling completed
- Good basic understanding of technical matters
- Clean, precise and reliable worker
- Quick to comprehend, able to work in a team, and willing to develop your professional skills

Main focus of training

- Turning and milling work
- Programming CNC machining tools
- Operating machine tools

You will be trained in our **state-certified apprentice training center**, which has its own training workshops and classrooms, in our production facilities and at vocational school. As a special benefit, we offer our future skilled workers the opportunity to gain additional qualifications during their apprenticeships, such as a crane-driver's license, training to become a safety officer, or welding and hard-annealing qualifications according to international standards.

Try it out and get to know us

If you're not quite sure what career to choose, whether you fit in with us or we fit in with you, we can simply get to know one another during an info or trial day. If we have aroused your interest, please send an e-mail to lehre.weiz@andritz.com
